

# INSPIRE ADVANCED

SPECIALIST WORKSHOP FOR PI PRACTITIONERS  
WHO WORK WITH DEVELOPMENT

YOU ARE LOOKING TO GET MAXIMUM VALUE FROM THE PI TOOLS IN YOUR DAY-TO-DAY WORK WITH DEVELOPING EMPLOYEES AND/OR MANAGERS, BOTH IN AD-HOC SITUATIONS AND IN BUILDING A SYSTEMATIC APPROACH TO DEVELOPMENT.

## WHY YOU SHOULD PARTICIPATE

If your organisation knows how to challenge and develop its employees, you become a place that attracts skilled individuals. The desire and the need to learn new things and to develop yourself is high on the agenda for employees of today, and perhaps even more so for the employees of tomorrow.

PI is as a tool with great potential and the optimal platform for organising your development initiatives.

In this workshop, we will focus on PI's features when it comes to motivation, self-awareness, collaboration skills, communication preferences, and much more – all of which are relevant when focusing on personal and/or leadership development.

## WHAT YOU WILL GET

An understanding of business- and customer-oriented development  
Inspiration for how to make an overall strategic perspective go hand in hand with the personal motivation of individuals

An understanding of how to have a systematic approach to development  
Ideas for how to identify and seize ad hoc development opportunities  
Insights into dialogue and questioning techniques for development purposes  
An overview of the PI INSPIRE reports that support internal development

PI CERTIFICATION REQUIRED FOR PARTICIPANTS
